

Mary Jo Smith  
Section 23345

### Fulltext Periodical Articles

Broad topic: Origins of farming, or agriculture.

Narrowed topic: Humans had their origins as hunters and gatherers – they went out and *found* food. Then, at some point, they started growing edible plants, and keeping animals for food. I am mostly interested in the plants. What caused groups to shift to cultivating plants? Was it population pressure? What are the latest theories? [If you have changed your topic, you can put that changed topic here.]

Hotz, Robert Lee. "Scientists Follow a Grain to the Origins of Agriculture, Food: DNA Study Suggests Crops Began in Turkey. Primitive Society Apparently Embraced Farming Quickly." The Los Angeles Times (14 Nov. 1997): A1:5. ProQuest Newspapers. ProQuest. Cabrillo College Library, Aptos, CA. 21 April 2003 <<http://proquest.umi.com>>.  
This is a newspaper article.

Mannion, A.M. "Domestication and the Origins of Agriculture: An Appraisal." Progress in Physical Geography 23 (1999): 37-56.  
This is a journal article.

Rensberger, Boyce. "Farming May Have Begun By Choice, Not By Chance." The Washington Post. Final edition. (3 Apr. 1995): A.03. ProQuest Newspapers. ProQuest. Cabrillo College Library, Aptos, CA. 22 April 2003 <<http://proquest.umi.com>>.
